

MetaLIFT™

CROWN & BRIDGE REMOVAL & REPAIR SYSTEM

by  HÄGER
WORLDWIDE

A Revolutionary Precision Crown & Bridge Removal & Repair System

Gently removes restorations, allowing them to be saved and reused.

REMOVES: Inlays, Onlays, Crowns, Fixed Bridges, Removable Fixed Prostheses, Implant Supported Fixed Prostheses.

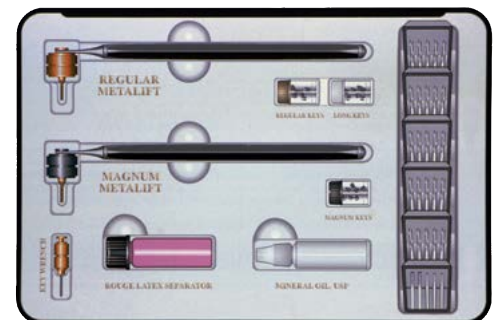

- Save time, frustration, patient retention and costs
- "Highest Rated Crown Remover" in the leading clinician's consumer report
- Great for General Dentists, Endodontists, and Prosthodontists

Insurance Codes: Plus when MetaLIFT™ is used to remove a crown or bridge, the ADA code 2980 "crown repair by report, including removal" applies. Also, placing a key in the crown qualifies as a crown repair and can be charged as such using ADA code 2920 "reccent crown".

These codes are used along with the regular ADA codes that describe the treatments done (ex. Endodontic therapy, core buildup, including any pins, etc.). The Canadian code is 29301 "remove inlay, onlay, crown, or veneer".

In short, dentists can pay for the MetaLIFT™ system with two crown repairs.

If you perform any procedure that involves crown and bridge, it's essential to have the best available system to remove them... MetaLIFT™ is that system. Call today for more information: (800) 328-2335 or email us at metalift@hagerworldwide.com.

Your MetaLIFT™ Kit includes all required components plus a technical manual and instructional video.
